Bamboo Cth-461 Driver For Mac

Edit: Ive now fixed the touch driver too, to stop it from crashing when multi-finger gestures are attempted Edit 2: Ive now added support for Intuos 3 tablets too Edit 3: Cintiq 21UX 1st Gen and Cintiq 20WSX are also supported level 2 3 points 8 months ago Thank you so much dude You are amazing I registered reddit to say thank you to you The world needs more smart and kind people like you level 2 3 points 8 months ago CTL-460 is fixed.. If want edit a picture, I am your order body andersondiazs level 2 3 points 5 months ago Will you marry me Thanks bro level 2 2 points 5 months ago any way this discovery works with Bamboo CTH661s fun I am devastated here.. What could it be Please I need help level 2 1 point 4 months ago I have Intuos 4 Wireless (PTK-540WL).. Awsome Thanks a lot Isa (IG- belqbel) level 2 1 point 5 months ago Hi, I hope you can answer me again.. Press question mark to learn the rest of the keyboard shortcuts Log in sign up User account menu 136 Fixed driver for Bamboo tablets on macOS Catalina.. Bamboo Cth-461 Mac Os And HadJust updated my mac os and had a lot of work to do and my tablet just noped on me.. I have a CTH 470 with pen and mac catalina 10 15 2 I followed your guide literally but it still doesnt work.

All that bullshit from Wacom saying its a hardware incompatibility and its impossible for them to fix it and here you are making it look so simple (was great how you broke it down) Im home for the holidays with only my old tablet and without this I wouldnt have been able to finish some art in time for Christmas tomorrow.. Any thoughts Continue this thread level 2 1 point 4 months ago I have a BambooCTH-470 that wont work with Catalina.. Honestly thank you so much View entire discussion (254 comments) More posts from the wacom community Continue browsing in r/wacom r/wacom r/Wacom, The Unofficial Official Wacom Support..
